Accomplished team lead with more than 9 years of industry experience in product and project/agency environments.

I am acquainted with people management, mentoring and sponsorship, hiring, technical interviews and have a strong team spirit. With my solid technical background and my proficiency in agile methodologies, delivery processes and development practices, I bring a broad skillset for setting up strategies and improving processes. As an open minded and approachable personality with strong values and ethics I strive to also shape my team's culture.

## experience

### 2016-08 – 2020-03 (3.7Y) Lead Developer Tablet Solutions GmbH

Lead of the development team (5ppl) of a SaaS startup in the field of industrial construction and process digitalization.

In my role as technical lead I took a big part in lifting the product from an early MVP into a robust, highly customizable SaaS platform that it is now.

Responsible for the engineering department, I recruited most of the development and QA team, set up technical standards and guidelines, established a DevOps mindset and added BDD, test automation and production monitoring into our development process; Always acting under the maxim to deliver value faster to our users, ensuring that we build the right thing in a robust product.

I was also working closely with the PO on defining user stories, backlog prioritization and long-term feature planning.

Having a strong interest in process and development frameworks, I played a big part in shaping the agile mindset of the company as Scrum Master.

### 2011-01 – 2016-07 (5.5Y) Software Developer EMAKINA CEE (formerly diamond:dogs gmbh)

IC for various projects for Austrian and international customers.

I had the opportunity to work with some great minds and get a fundamental understanding of state-of-the-art software development practices and an in-depth understanding of the .NET framework for the mobile, Windows and web stack.

Most prominent project was a .NET/Angular SPA for (\$57a) vehicle safety inspection that was rolled out nationwide.

## education

2006 – 2009 Software Engineering  
University of Applied Sciences Upper Austria, Campus Hagenberg

1997 – 2005 BG/BRG Gmunden

## languages

German Native (C2)  
English Proficient (C1)  
French Basic (A1)

## certifications

2018 Certified Scrum Master (Scrum Alliance)

## personal

I am passionate about innovations and technology and am always keen to learn new methodologies and frameworks. In my spare time I like to find peace in nature and photography, get lessons from history, get myself excited about team-sports and try to find new personal challenges with downhill mountain biking.

## skills
